

GROUNDING RESEARCH REPORT

EXECUTIVE SUMMARY

The runtime did not reach a well-supported conclusion yet.

OBJECTIVE

From 2020 to 2050, how many elderly people will there be in Japan? What is their consumption potential across various aspects such as clothing, food, housing, and transportation? Based on population projections, elderly consumer willingness, and potential changes in their consumption habits, please produce a market size analysis report for the elderly demographic.

FINDINGS

c001: The strongest answer will depend on source quality rather than source volume.

- Status: weak
- Confidence: 0%
- Supporting sources: None
- Contradicting sources: None

c002: Contradictions are likely to expose the most important follow-up questions.

- Status: weak
- Confidence: 0%
- Supporting sources: None
- Contradicting sources: None

c003: A sufficient answer must identify limits and uncertainty, not only a conclusion.

- Status: weak
- Confidence: 0%
- Supporting sources: None
- Contradicting sources: None

EVIDENCE TABLE

Source	Type	Reliability	Excerpt
---	---	---	---

CONTRADICTIONS

- No explicit contradictions detected.

CONFIDENCE SCORES

- Objective completion: 0%
- Evidence coverage: 0%
- Source diversity: 0%
- Primary authority coverage: 0%
- Contradiction resolution: 100%
- Citation grounding: 0%
- Mean claim confidence: 0%

- Weakest claim confidence: 0%
- Confidence stability: 100%
- Open-question penalty: -25%
- Blocked-source penalty: -0%
- Confidence cap: 82%
- Overall confidence: 0%

RUN METRICS

- Total runtime: 0.013 seconds
- Iterations completed: 4
- Agents spun off: 48
- Tasks generated: 12
- Hypotheses generated: 3
- Evidence records collected: 0
- Source categories: 0
- Claims evaluated: 3
- Supported claims: 0
- Contradictions detected: 0
- Contradictions resolved: 0
- Open questions remaining: 6
- Stop conditions met: False

Agent Breakdown

- program_generator: 1
- planner_orchestrator: 1
- hypothesis_agent: 1
- hypothesis_refinement_agent: 4
- web_search_agent: 4
- academic_agent: 4
- legal_agent: 4
- company_intelligence_agent: 4
- social_signal_agent: 4
- extraction_agent: 4
- critic_agent: 4
- evaluator_agent: 4
- knowledge_gap_detector: 4
- auto_tuner: 4
- report_generator: 1

LIMITATIONS

- This prototype uses deterministic baseline agents and a small built-in evidence fixture for the demo domain.
- A production deployment should replace the fixture with live legal, academic, web, and company-intelligence search agents.

OPEN QUESTIONS

- What additional authoritative evidence would resolve claim c001: The strongest answer will depend on source quality rather than source volume.

- What additional authoritative evidence would resolve claim c002: Contradictions are likely to expose the most important follow-up questions.
- What additional authoritative evidence would resolve claim c003: A sufficient answer must identify limits and uncertainty, not only a conclusion.
- Are all program subquestions represented by explicit claims?
- Critic follow-up: c001: no supporting evidence yet.
- Critic follow-up: c001: confidence below support threshold (0%).
